Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/598,062	Applicant(s) GRIFFITS ET AL.	
	Examiner CHRISTOPHER STANFORD	Art Unit 2887	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- I. Group I, claim(s) 47-66, drawn to a color coded key ID, classified in class 235, subclass 494.
 - II. Group II, claim(s) 67-73, drawn to an electrically operable system storing color coded information, classified in class 235, subclass 469.
 - III. Group III, claim(s) 74-82, drawn to an electrically operable system for identifying keys, classified in class 235, subclass 492.
2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the structural and functional limitations of Group I and II are only linked by the well known technical feature of a color coded key. Group I is drawn to the information of the key ID itself and is not linked to a particular structure or method for storing and therefore has separate utility in a credit card transaction system, for example.

Art Unit: 2887

3. The inventions listed as Groups II and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the structural and functional limitations of Group II and III are only linked by the well known technical feature of a color coded key. Group II is drawn to the system for storing the color coded information and does not provide a method responding to nor indicating a key inventory/organization, and this Group II has separate utility in tracking misplaced items in which the location is unknown and without the assistance of an additional electronic device.

4. The inventions listed as Groups I and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the structural and functional limitations of Group II and III are only linked by the well known technical feature of key-related color information. Group III is drawn to the system for identifying an inventory of keys associated with an electrical device for indicating. This group does not require a color coded key ID as shown in figures 2 & 3 of the instant application. Group III has separate utility with keys that are not color coded in the manner of Group I.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

Art Unit: 2887

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
